

Regarding petition 04-160.

As a long term member of XM, I am highly irritated that this petition is trying to remove the programming that I pay for because of local broadcasters not having the ideas to conform to todays radio listeners desires. In my case, there are no clear radio receptions for news, traffic and weather unless I drive forty miles to the south towards the Los Angeles basin. I cam able to here news, traffic and weather BEFORE I leave my home, not after I am already in traffic congestion or poor weather. I have several small children and I depend on these XM services to make travel decisions for myself and for the safety of my wife and young children. By approving the petition, you are removing my safety blanket for the transportation of my family. The NAB has no right or authority to do such a thing and I will not stand for it. I am very much into reveiwing politics and agendas and if this petition is approved, the approving political members will see a DRASTIC REDUCTION IN VOTES AS WE VOTE FOR OTHER WHO WANT TO HEAR OUR VOICE, NOT THE POCKETBOOKS OF LOBBYISTS. I urge you to vote and reject the NAB's petition 04-160.

Sincerely,

Steven J. Navarro  
Concerned Father of Three
